

Flash Smart Eye 24/7 camera surveillance

Flash Smart Eye is a full-service rental concept for 24/7 CCTV surveillance, which consists of a complete unit with a dome camera, LED lighting, battery backup and 24/7 monitoring by Trigion Alarm Service Centre.

By using the latest IP cameras and the most advanced analysis software, Flash Smart Eye detects undesirable situations, and Flash Smart Eye immediately captures these in images. Based on these images, the control room operator can launch a live stream and play back on-site audio files. If necessary, a supervisor can immediately be alerted in order to check the situation on the ground.
